# Foreword

We are pleased to welcome international students from many different countries and universities to the Munich International Summer University (MISU) in Germany.

The European Studies Program takes place under the patronage of the Chair of Political Systems and European Integration at Ludwig-Maximilians-Universität München in cooperation with the Department of International Relations of Central European University (CEU) Vienna.

The European Union is the most prominent example of regional cooperation. Both historical lessons and today's global challenges spur European states to prefer cooperation over unilateral policy-making.

Starting out as a peace project resting primarily on economic cooperation, the EU has developed into a supranational polity that does not fit neatly into the categories of a 'state' or an 'international organisation'. European integration resulted in ever expanding EU authority, the 'Europeanization' of national political and economic systems as well as increased foreign security policy cooperation.

At the same time, however, disagreement on how to deal with crises in Europe's eastern and southern neighbourhood, on the handling of refugee flows from the Middle East as well as the still looming sovereign debt crisis seem to show the limits of European consensus and solidarity. Time and again, national particularities appear at odds with the common interests. Domestically, public opinion has become less favourable with regard to European cooperation than it had been in the past, with the United Kingdom having decided to exit the Union. Internationally, the EU is triggered to re-consider its global role given the past US administration's isolationist tendencies and the current security challenges such as the war in Ukraine.

Decades of European governance and most recent crises phenomena increased levels of politicization and societal mobilization in Europe. Citizens increasingly form political attitudes and enter into societal conflict along identity lines. Beyond the previous cleavage between left-wing socialist and right-wing neoliberal economic views, today cosmopolitan, green and alternative perspectives clash with traditional, authoritarian and nationalist groups thereby challenging the national and European political systems and decision-makers to organize compromise in society.

The Munich International Summer University is based on an interdisciplinary approach. It combines different methodologies such as lectures, round-table discussions, group-work and students' presentations along with excursions. In addition to the academy, we encourage you to engage in a vibrant international student life on the campus of LMU Munich during the summer of 2026.
